Night on Earth Davide Rodogno,2021-12-09 Night on Earth is a broad-ranging account of international humanitarian programs in Central and Eastern Europe, the Balkans and the Near East from 1918 to 1930. Davide Rodogno shows that international 'relief' and 'development' were intertwined long before the birth of the United Nations with humanitarians operating in a region devastated by war and famine and in which state sovereignty was deficient. Influenced by colonial motivations and ideologies these humanitarians attempted to reshape entire communities and nations through reconstruction and rehabilitation programmes. The book draws on the activities of a wide range of secular and religious organisations and philanthropic foundations in the US and Europe including the American Relief Administration, the American Red Cross, the Quakers, Save the Children, the Near East Relief, the American Women's Hospitals, the League of Nations and the International Committee of the Red Cross.

Bundesliga 2012-13 Simon Barclay,2013-06 The 2012-13 Bundesliga season saw total domination by a record-breaking Bayern Munich side which would go on to win the Champions League and the German Cup as well as their first Bundesliga title

for three years. Borussia Dortmund consoled themselves with the runners-up spot and a place in the Champions League final. This was the year when everyone sat up and took notice of German football. This 375-page book details every league match of the season, with week-by-week tables showing the teams' movements throughout the 34 rounds of matches. Every match line-up is included, along with details of every player appearance. Finally, this comprehensive record also provides statistics on attendances, referees performances, disciplinary records, goalscorers and managerial records. Fully in English.

The Internal Geography of Trade Thomas Farole,2013-05-03 Economic theory, including endogenous growth, the role of institutions, and, most importantly, the New Economic Geography (NEG), have made significant progress in explaining the emergence of core-periphery patterns behind this divergence. They point to the critical role of agglomeration, which confers benefits to metropolitan cores that have the advantages of large markets, deep labor pools, links to international markets, and clusters of diverse suppliers and institutions. Regions relatively near the metropolitan core are likely to benefit from spillovers and congestion-related dispersion. Regions further outside the core however, are not only less able to take advantage of spillovers, but also more likely to be far removed from key infrastructural, institutional, and interpersonal links to regional and international markets. As a result, they face significant challenges to becoming competitive locations to host economic activity. Thus the geographical pattern of core and peripheral regions is increasingly manifest in an economic pattern of 'leading' and 'lagging' regions.
