Beyond the Random Walk Vijay Singal,2006 In an efficient market, all stocks should be valued at a price that is consistent with available information. But as financial expert Singal points out, there are circumstances under which certain stocks sell at a price higher or lower than the right price. Here he discusses ten such anomalous prices and shows how investors might--or might not--be able to exploit these situations for profit.

Labour Law Reforms in India Anamitra Roychowdhury,2018-03-28 Labour market flexibility is one of the most closely debated public policy issues in India. This book provides a theoretical framework to understand the subject, and empirically examines to what extent India's 'jobless growth' may be attributed to labour laws. There is a pervasive view that the country's low manufacturing base and inability to generate jobs is primarily due to rigid labour laws. Therefore, job creation is sought to be boosted by reforming labour laws. However, the book argues that if labour laws are made flexible, then there are adverse consequences for workers: dismantled job security weakens workers' bargaining power, incapacitates trade union movement, skews class distribution of output, dilutes workers' rights, and renders them vulnerable. The book: identifies and critically examines the theory underlying the labour market flexibility (LMF) argument employs innovative empirical methods to test the LMF argument offers an overview of the organised labour market in India comprehensively discusses the proposed/instituted labour law reforms in the country contextualises the LMF argument in a macroeconomic setting discusses the political economy of labour law reforms in India. This book will interest scholars and researchers in economics, development studies, and public policy as well as economists, policymakers, and teachers of human resource management.

Empirical Studies in Industrial Organization David B. Audretsch,J.J. Siegfried,2012-12-06 Empirical Studies in Industrial Organization brings together leading scholars who present state-of-the-art research in the spirit of the structure-conduct-performance paradigm embodied in the work of Leonard W. Weiss. The individual chapters are generally empirically or public policy oriented. A number of them introduce new sources of data that, combined with the application of appropriate econometric techniques, enable new breakthroughs and insights on issues hotly debated in the industrial organization literature. For example, five of the chapters are devoted towards uncovering the link between market concentration and pricing behavior. While theoretical models have produced ambiguous predictions concerning the relationship between concentration and price these chapters, which span a number of different markets and situations, provide unequivocal evidence that a high level of market concentration tends to result in a higher level of prices. Three of the chapters explore the impact of market structure on production efficiency, and three other chapters focus on the role of industrial organization on public policy. Contributors include David B. Audretsch, Richard E. Caves, Mark J. Roberts, F.M. Scherer, John J. Siegfried and Hideki Yamawaki.

Ladyparts Deborah Copaken,2021-08-03 A frank, witty, and dazzlingly written memoir of one woman trying to keep it together while her body falls apart—from the “brilliant mind” (Michaela Coel, creator of I May Destroy You) behind Shutterbabe “The most laugh-out-loud story of resilience you’ll ever read and an essential road map for the importance of narrative as a tool of healing.”—Lori Gottlieb, bestselling author of Maybe You Should Talk to Someone NAMED ONE OF THE BEST BOOKS OF THE YEAR BY REAL SIMPLE I'm crawling around on the bathroom floor, picking up pieces of myself. These pieces are not a metaphor. They are actual pieces. Twenty years after her iconic memoir Shutterbabe, Deborah Copaken is at her darkly comedic nadir: battered, broke, divorcing, dissected, and dying—literally—on sexism's battlefield as she scoops up what she believes to be her internal organs into a glass container before heading off to the hospital . . . in an UberPool. Ladyparts is Copaken's irreverent inventory of both the female body and the body politic of womanhood in America, the story of one woman brought to her knees by the one-two-twelve punch of divorce, solo motherhood, healthcare Frogger, unaffordable childcare, shady landlords, her father's death, college tuitions, sexual harassment, corporate indifference, ageism, sexism, and plain old bad luck. Plus seven serious illnesses, one atop the other, which provide the book's narrative skeleton: vagina, uterus, breast, heart, cervix, brain, and lungs. Copaken bounces back from each bum body part, finds workarounds for every setback—she

transforms her home into a commune to pay rent, sells her soul for health insurance, turns FBI informant when her sexual harasser gets a presidential appointment—but in her slippery struggle to survive a steep plunge off the middle-class ladder, she is suddenly awoken to what it means to have no safety net. Side-splittingly funny one minute, a freak horror show the next, quintessentially American throughout, *Ladyparts* is an era-defining memoir.

Life Deluxe Jens Lapidus,2014-09-16 The final chapter in the electrifying Stockholm Noir Trilogy, which has been translated into more than thirty languages worldwide: here is the no-holds-barred, rapid-fire tale of a supreme struggle for the legacy of the Swedish underworld, as the power, honor, and respect commanded by Stockholm’s largest criminal organization are passed from father to daughter. Jorge was making a living as a drug dealer until he was caught and thrown into prison. Recently released and warned to keep out of trouble, he’s already bored with his new existence: selling lattes and cappuccinos at a café. Who wouldn’t be? But Jorge has a plan, and big money looms on the horizon if he can pull off one final audacious heist and flee the country before the police close in. Meanwhile, Deputy Inspector Martin Hågerström—entrusted with a secret mission, code name Operation Tide—has gone deep undercover as a disgraced cop turned corrections officer. He’s slowly earning the trust of Stockholm’s imprisoned expert money launderer, Johan Westlund. A career criminal with a taste for the jet-setting lifestyle, JW is a dangerous man to befriend, one who may demand more loyalty than Hågerström had planned on offering. Natalie is the twenty-two-year-old daughter of Radovan Kranjic, the Serbian crime boss who rules Sweden’s underworld. When an assassin threatens Radovan’s life, Natalie is hurled into a chaotic struggle for control of her father’s empire—and the competition is fierce. Who will rise to power in the voracious hunt for money, prestige, and luxury to become Stockholm’s new king—or queen—of crime?

Tech Stock Valuation Mark Hirschey,2003-09-18 Tech Stock Valuation extends the R&D literature by providing detailed direct evidence on the market value implications of inventive and innovative output. Specifically, the text demonstrates that stock-price effects of patent output are most pronounced in the case of high-quality patents, where patent quality is measured by scientific merit. Scientific measures of patent quality give students a valuable new tool that can be used to measure R&D program effectiveness. At the same time, it gives investors a new tool to help them assess the value of hard-to-measure intangible assets. The book is an ideal resource for professionals working in finance and accounting; investment professionals and industry analysts who work for companies that engage in research and development; MBA students; economists working in industrial organizations, microeconomics, and contract theory. Provides detailed direct evidence on the market value implications of inventive and innovative output Based on recent research, much of which Dr. Hirschey has pioneered Gives financial professionals a new tool for assessing R&D quality and its relation to market valuation

Canada in the Global Village Heather Menzies,1997-09-15 This text provides an inter-disciplinary critique of the new global economy and information society, tracing its roots in the infrastructures of Canada's development from the canoes and ships of the fur trade, through the railways and telegraph of industrialization, to mass-print media, radio, television and film distribution.
