Home Winemaking Jack Keller, 2021-05-25 Simple Instructions and Superb Recipes from a Winemaking Legend With local breweries and wineries popping up everywhere, learning how to make wine is on everyone's "to do" list. Utilize the guidance of home-winemaking legend Jack Keller. In the 1990s, Jack started one of the first (if not the first) wine blogs on the internet. His expertise is shared with you in Home Winemaking. It takes a fun, practical, step-by-step approach to making your own wine. The book begins with an introduction to winemaking, including basic principles, equipment needed, and exactly what to do. After the fundamentals are covered, you're introduced to a variety of tested, proven, delicious recipes. More than just grape wines, you'll learn how to make wine out of everything from juices and concentrates to foraged ingredients such as berries and roots. There are even recipes that utilize dandelions and other unexpected ingredients. With 65 recipe options, you can expand your winemaking season indefinitely! Jack's simple approach to the subject is perfect for beginners, but winemakers of every skill level will appreciate the recipes and information. So get this essential winemaking book, and get started. You'll be sipping to your success in no time.

Grapes into Wine Philip M. Wagner, 1976-06-12 As the first to write a basic book in English on winemaking from the winemaker's point of view, Philip Wagner has long been considered an authority on the subject, and his book American Wines and Wine-Making has become a bible for small producers and home winemakers in this country. Now, in this completely new version of that classic, Mr. Wagner takes into account the many dramatic changes that in recent years have revolutionized the American wine scene. With the knowledge that comes from his own experimentation, Mr. Wagner discusses the new, successful hybrids that have now made it possible to grow wine-producing grapes in far more areas of the United States than used to be considered feasible. Once again he covers all the basic technical information, including recent developments important to the small commercial winery and to the home producer—from the choice of the right vines to the vintage itself, the care of the new wines, and finally the bottling of the wine: red, white, and rosé, sparkling and sweet. There is a new chapter on concentrates for the growing number of people who want to make wine but are not close to a source for suitable grapes, or haven't the space to work with fresh materials. Mr. Wagner describes what concentrates are, how they are made, what the characteristics are of different types, and what to expect. There are specific instructions on procedure and on the necessary (and unnecessary) equipment. In addition, Philip Wagner's introductory chapters on the evolution of the wine grape, on European winegrowing, and on the contemporary scene throughout the United States provide an excellent guide for the consumer, as does his concluding chapter on tasting and using wine. Peppered throughout with a wealth of historical and anecdotal material as well as down-to-earth experience—and full of the author's appreciation of wine and winemaking as a way of life—this book is not only a useful guide but delightful and rewarding reading.

The Technology of Wine Making Maynard Andrew Amerine, Harold W. Berg, 1980 Abstract: The revolution in the ancient art of wine making really began with Pasteur, whose knowledge of chemistry and microbiology led to the application of scientific principles to the fermentation process. The scientific approach continues to grow in importance, although certain aspects of growing and fermenting grapes, not to mention tasting the wine, defy definition. In an effort to keep abreast of this burgeoning technology, an updated reference work explains commercial production techniques for all types of wine (red, white, sparkling, sherry, port, fruit, and brandy) and processes for avoiding bacterial and non-bacterial spoilage. Winery equipment and design, the molds and yeasts of grapes and wines, and the chemistry of fermentation are discussed in detail. Although the major wine producing areas of the world are described, emphasis is on American varieties, both eastern and western.

Modern Winemaking Philip Jackisch, 2018-10-18 Here is a practical, comprehensive guide to winemaking, wines, and wine appreciation, written by an expert uniquely qualified by many years of experience in the field. Looking at winemaking as a craft as well as an art, Philip Jackisch augments a wealth of information and theory with many detailed examples. It is now possible for anyone with access to grapes or other ingredients of decent quality to make consistently palatable or even excellent wines, he writes. In clear language aimed at the amateur winemaker, Jackisch explains the science behind wine and its application to winemaking. At the same time, he includes important material for commercial winemakers. Jackisch covers each step in the process of winemaking, from growing or purchasing grapes; choosing equipment; fermenting, aging, and storing the wine; to keeping records. By exploring in detail the various factors that affect wine quality, he shows which elements in wine production can be controlled to achieve certain sensory results. Among the other subjects he discusses are specific types of wine, ways of evaluating wine, common problems in cellar operations and how to prevent or correct them, and wine competitions. Five appendixes supply additional technical information. Since 1985, Modern Winemaking has proven invaluable for winemakers, both commercial and amateur, for wine educators and students, and indeed, for anyone who wants to know more about wine.

Techniques in Home Winemaking Daniel Pambianchi, 2011-08 Offers an overview and instructions on how to make homemade wine, including topics such as selecting the type of grapes to use, what equipment to buy, and how to make popular wines like pinot noir or port wine.

Successful Wine Making H. E. Bravery, 2012-09-01

Postmodern Winemaking Clark Smith, 2013-11-02 In *Postmodern Winemaking*, Clark Smith shares the extensive knowledge he has accumulated in engaging, humorous, and erudite essays that convey a new vision of the winemaker's craft--one that credits the crucial roles played by both science and art in the winemaking process. Smith, a leading innovator in red wine production techniques, explains how traditional enological education has led many winemakers astray--enabling them to create competent, consistent wines while putting exceptional wines of structure and mystery beyond their grasp. Great wines, he claims, demand a personal and creative engagement with many elements of the process. His lively exploration of the facets of postmodern winemaking, together with profiles of some of its practitioners, is both entertaining and enlightening.

Home Winemaking For Dummies Tim Patterson, 2010-10-25 An informative, fun guide to making your own wine It's estimated that one million North Americans make their own wine. Relatively inexpensive to make (a homemade bottle costs from \$2 to \$4), a bottle with your own label (and grapes) is a fantasy even someone with modest aspirations can fulfill. Author Tim Patterson, an award-winning home winemaker, shows how it's possible for anyone to create a great wine. In *Home Winemaking For Dummies*, he discusses the art of winemaking from grape to bottle, including how to get the best grapes (and figure out how many you need); determine what equipment is required; select the right yeast and figure out if any other additives are needed; and store, age, and test wine. With detailed tips on creating many varieties -- from bold reds and demure whites to enchanting rosés and delightful sparkling wines -- this guide is your ultimate winemaking resource.

First Steps in Winemaking Cyril J. J. Berry, 1994-09 With more than two million copies sold, this comprehensive guide is the ideal introduction to the fascinating craft of winemaking.

The Technology of Wine Making Maynard Andrew Amerine, William Vere Cruess, 1960

Wine Analysis and Production Zoecklein, 2013-03-09 Winemaking as a form of food preservation is as old as civilization. Wine has been an integral component of people's daily diet since its discovery and has also played an important role in the development of society, religion, and culture. We are currently drinking the best wines ever produced. We are able to do this because of our increased understanding of grape growing, biochemistry and microbiology of fermentation, our use of advanced technology in production, and our ability to measure the various major and minor components that comprise this fascinating beverage. Historically, winemakers succeeded with slow but gradual improvements brought about by combinations of folklore, observation, and luck. However, they also had monumental failures resulting in the necessity to dispose of wine or convert it into distilled spirits or vinegar. It was assumed that even the most marginally drinkable wines could be marketed. This is not the case for modern producers. The costs of grapes, the technology used in production, oak barrels, corks, bottling equipment, etc., have increased dramatically and continue to rise. Consumers are now accustomed to supplies of inexpensive and high-quality varietals and blends; they continue to demand better. Modern winemakers now rely on basic science and the systematic application of their art to produce products pleasing to the increasingly knowledgeable consumer base that enjoys wine as part of its civilized society.

The Art of Wine-making, in All Its Branches David Booth, 1834

From Vines to Wines Jeff Cox, 1999-01-01 Tells how to select, plant, cultivate, train, prune, protect and harvest grapes, and explains each step in making wine

Yeasts in the Production of Wine Patrizia Romano, Maurizio Ciani, Graham H. Fleet, 2019-09-16 It is well established that certain strains of yeasts are suitable for transforming grape sugars into alcohol, while other yeast strains are not suitable for grape fermentations. Recent progress has clearly demonstrated that the sensory profile of a wine is characteristic of each vine cultivated, and the quality and technological characteristics of the final product varies considerably due to the strains which have performed and/or dominated the fermentation process. Because of their technological properties, wine yeast strains differ significantly in their fermentation performance and in their contribution to the final bouquet and quality of wine, such as useful enzymatic activities and production of secondary compounds

related both to wine organoleptic quality and human health. The wine industry is greatly interested in wine yeast strains with a range of specialized properties, but as the expression of these properties differs with the type and style of wine to be made, the actual trend is in the use of selected strains, which are more appropriate to optimize grape quality. Additionally, wine quality can be influenced by the potential growth and activity of undesirable yeast species, considered spoilage yeasts, which cause sluggish and stuck fermentation and detrimental taste and aroma in the wine.
