12th Conference on British and American Studies Marinela Burada,Raluca Sinu,Oana Tatu,2016-01-14 This book represents a selection of papers presented by academics and researchers at the 12th Conference on British and American Studies. They are grouped in two main theme clusters, corresponding to the two chapters of the book: Languages in Contact and Languages in Use and Multidisciplinarity and Multiculturalism in Literary Studies. In the first section, language is described, in turn, as subject to influence by other language systems, as an object of learning and acquisition, and as an instrument enabling users to bridge between cultures, disciplinary domains, and people. The second part of the volume is mainly concerned with such notions as hybridity, tolerance, identity, subversion and deconstruction, as reflected in classical and contemporary Anglo-American literary texts.

ON THE ARCHITECTURE OF WORDS. APPLICATIONS OF MEANING STUDIES GODED RAMBAUD Margarita ,IBÁÑEZ MORENO Ana ,HOSTE Veronique ,MATTENS Sil ,DE CONINCK Peter ,2015-05-27 In light of today's extensive use of digital communication, this volume focuses on how to understand and manage the various types of linguistically-based products that facilitate the

use and extraction of information. Including conceptual and terminological databases, digital dictionaries, thesauri, language corpora, and ontologies, they all contribute to the development and improvement of language industries, such as those devoted to automatic translation, knowledge management, knowledge retrieval, linguistic data analysis, and so on. As the theoretical background underlying these applications is outlined in detail in the earlier chapters of the book, the reader is able to establish the necessary links between the various but related kinds of linguistic –and, in particular, semantic– applications. A general review of several theories and linguistic models that influence the practical application of Meaning studies to the new technologies is also included. This book is aimed at students and researchers of Linguistics, as well as those with a basic knowledge of Linguistics and Semantics who are interested in the on-going development of the handling of meaning and its practical usage

Learning english through ICT tools Silvia Sánchez Calderón,2020-06-01 The present book has been written for teachers and students of English as a second language (L2, henceforth) and considers the three educational levels, namely, school, college and university. They will find it as a useful resource since it provides readers with insights, suggestions and approaches to implement the so-called Information and Communication Technology (ICT, henceforth) tools to develop the four language skills, namely, reading, writing, listening and speaking, along with a grammar knowledge. More specifically, this book will contribute to help L2 English teachers in designing creative and motivating lesson plans in which L2 English students will learn English through the use of ICT tools while developing several competences such as the digital competence, the learning to learn (that is to say, they learn by doing), autonomy and an active role given they are responsible for their own learning. In this student-centred approach, the teacher is a guide and a facilitator of resources. The resources described in this book will foster L2 English teachers and L2 English learning to consider that lesson plans are more effective when the teacher has determined the learning and teaching objectives for both ICT and English. A detailed explanation regarding how each ICT tool functions is provided in the corresponding chapters so that L2 English teachers are able to build standing selection criteria when applying each ICT tool in the classroom.

Teaching Translation LAWRENCE VENUTI,2016-08-05 Over the past half century, translation studies has emerged decisively as an academic field around the world, and in recent years the

number of academic institutions offering instruction in translation has risen along with an increased demand for translators, interpreters and translator trainers. Teaching Translation is the most comprehensive and theoretically informed overview of current translation teaching. Contributions from leading figures in translation studies are preceded by a substantial introduction by Lawrence Venuti, in which he presents a view of translation as the ultimate humanistic task – an interpretive act that varies the form, meaning, and effect of the source text. 26 incisive chapters are divided into four parts, covering: certificate and degree programs teaching translation practices studying translation theory, history, and practice surveys of translation pedagogies and key textbooks The chapters describe long-standing programs and courses in the US, Canada, the UK, and Spain, and each one presents an exemplary model for teaching that can be replicated or adapted in other institutions. Each contributor responds to fundamental questions at the core of any translation course – for example, how is translation defined? What qualifies students for admission to the course? What impact does the institutional site have upon the course or pedagogy? Teaching Translation will be relevant for all those working and teaching in the areas of translation and translation studies. Additional resources for Translation and Interpreting Studies are available on the Routledge Translation Studies Portal.

   Sites of Translation Laura Gonzales,2018-09-24 Winner of the 2016 Sweetland Digital Rhetoric Collaborative Book Prize Sites of Translation illustrates the intricate rhetorical work that multilingual communicators engage in as they translate information for their communities. Blending ethnographic and empirical methods from multiple disciplines, Laura Gonzales provides methodological examples of how linguistic diversity can be studied in practice, both in and outside the classroom, and provides insights into the rhetorical labor that is often unacknowledged and

made invisible in multilingual communication. Sites of Translation is relevant to researchers and teachers of writing as well as technology designers interested in creating systems, pedagogies, and platforms that will be more accessible and useful to multilingual audiences. Gonzales presents multilingual communication as intellectual labor that should be further valued in both academic and professional spaces, and supported by multilingual technologies and pedagogies that center the expertise of linguistically diverse communicators.

Metaphors in Learner English Susan Nacey,2013-11-15 This volume presents results from a corpus-based investigation into the metaphorical production of foreign language learners, comparing texts written by Norwegian (L2) learners of English with those written by British (L1) students. Three types of questions are addressed. The first has empirically measured answers: For example, do L2 English writers produce more metaphors than L1 novice writers? How frequent are novel metaphors in an L2, as compared with an L1? The second type has more subjective answers: How creatively do L2 English learners employ metaphor? Are they even expected to be able to produce metaphor at all? The third type combines theoretical and methodological perspectives: How is metaphorical creativity identified? What is the potential role of metaphoric competence? Most importantly, how are metaphors identified? To this end, the newly-developed 'Metaphor Identification Procedure' is tested and critiqued. This book is intended for metaphor researchers, corpus linguists, applied linguists and language educators.

From Barbycu to Barbecue Joseph R. Haynes,2023-07-11 An award-winning barbecue cook boldly asserts that southern barbecuing is a unique American tradition that was not imported. The origin story of barbecue is a popular topic with a ravenous audience, but commonly held understandings of barbecue are often plagued by half-truths and misconceptions. From Barbycu to Barbecue offers a fresh new look at the story of southern barbecuing. Award winning barbecue cook Joseph R. Haynes sets out to correct one of the most common barbecue myths, the Caribbean Origins Theory, which holds that the original southern barbecuing technique was imported from the Caribbean to what is today the American South. Rather, Haynes argues, the southern whole carcass barbecuing technique that came to define the American tradition developed via direct and indirect collaboration between Native Americans, Europeans, and free and enslaved people of African descent during the seventeenth century. Haynes's barbycu-to-barbecue history analyzes historical sources throughout the Americas that show that the southern barbecuing technique is as unique to the United States as jerked hog is to Jamaica and barbacoa is to Mexico. A recipe in each chapter provides a contemporary interpretation of a historical technique.

Navigate Your Faith Ron Pratt,2019 What's the point of being a Christian anymore? Many Christians today are feeling unfulfilled in their walk with God, and they have no idea it's because of the little decisions they're making each day that are leading them into lives of compromise. In Navigate Your Faith Ron Pratt uses a fictional American family to expose how the enemy lures

believers into prioritizing their own pleasure, entertainment, or career goals over their relationship with Christ. This erodes their passion for Jesus and causes them to become spiritually bored and have powerless Christian lives. Rather than claiming that God will approve of Christians no matter what they do, as some modern ministers do, Navigate Your Faith challenges readers to take a hard look at their lives and see if they're simply incorporating Jesus into their lifestyles or allowing Him to set them on a course of His choosing. With proven strategies to rebuild lost intimacy with God, this book will help Christians recognize the deceptive tactics of the enemy, break out of complacency, and make a greater impact on the world around them. This book will help you recognize and avoid the deception of today's nominal Christian culture.

The chapters of the volume illustrate a variety of topics that address this challenge, such as the use of rule-based approaches, compound splitting techniques, MWU identification methodologies in multilingual applications, and MWU alignment issues.
