Yaks Yak Linda Sue Park,2016-03-08 At once funny and informative, Yaks Yak presents animals acting out the verbs made from their names. Illustrations rich in comic details show hogs hogging, slugs slugging, and other spirited creatures demonstrating homographs, words with different meanings that are spelled and pronounced the same. A chart listing the words, their meanings, and their history is included. Ideal for sharing, this book offers a sprightly and fanciful introduction to a fun form of wordplay.

Quest for Harmony Chuan-kang Shih,2009-12-07 In this long-awaited ethnography, Chuan-kang Shih details the traditional social and cultural conditions of the Moso, a matrilineal group living on the border of Yunnan and Sichuan Provinces in southwest China. Among the Moso, a majority of the adult population practice a visiting system called tise instead of marriage as the normal sexual and reproductive institution. Until recently, tise was noncontractual, nonobligatory, and nonexclusive. Partners lived and worked in separate households. The only prerequisite for a tise relationship was a mutual agreement between the man and the woman to allow sexual access to each other. In a comprehensive account, Quest for Harmony explores this unique practice specifically, and offers thorough documentation, fine-grained analysis, and an engaging discussion of the people, history, and structure of Moso society. Drawing on the author's extensive fieldwork, conducted from 1987 to 2006, this is the first ethnography of the Moso written in English.

Environmental Humanities in the New Himalayas Dan Smyer Yü,Erik de Maaker,2021-06-16 Environmental Humanities in the New Himalayas: Symbiotic Indigeneity, Commoning, Sustainability showcases how the eco-geological creativity of the earth is integrally woven into the landforms, cultures, and cosmovisions of modern Himalayan communities. Unique in scope, this book features case studies from Bhutan, Assam, Sikkim, Tibet, Nepal, Pakistan, and Sino-Indian borderlands, many of which are documented by authors from indigenous Himalayan communities. It explores three environmental characteristics of modern Himalayas: the anthropogenic, the indigenous, and the animist. Focusing on the sentient relations of human-, animal-, and spirit-worlds with the earth in different parts of the Himalayas, the authors present the complex meanings of indigeneity, commoning and sustainability in the Anthropocene. In doing so, they show the vital role that indigenous stories and perspectives play in building new regional and planetary environmental ethics for a sustainable future. Drawing on a wide range of expert contributions from the natural sciences, social sciences, and humanist disciplines, this book will be of great interest to students and scholars of environmental humanities, religion and ecology, indigenous knowledge and sustainable development more broadly.

Noun-Modifying Clause Constructions in Languages of Eurasia Yoshiko Matsumoto,Bernard Comrie,Peter Sells,2017-02-28 This volume presents a cross-linguistic investigation of clausal noun-modifying constructions in genetically varied languages of Eurasia. Contrary to a common premise that, in any language, adnominal clauses that share some features of relative clauses constitute a structurally distinct construction, some languages of Eurasia exhibit a General Noun-Modifying Clause Construction (GNMCC) -- a single construction covering a wide range of semantic relations between the head noun and the clause. Through in-depth examination of naturally-occurring and elicited data from Ainu, languages of the Caucasus (e.g. Ingush, Georgian, Bezhta, Hinuq), Japanese, Korean, Marathi, Nenets, Sino-Tibetan languages (e.g. Cantonese, Mandarin, Rawang), and Turkic languages (e.g. Turkish, Sakha), the chapters discuss whether or not the language in question exhibits a GNMCC and the range of noun modification covered by such a construction. The findings afford us new facts, new theoretical perspectives and the first step toward a more global assessment of the possibilities for GNMCCs.

Grazing in Future Multi-scapes: From Thoughtscapes to Landscapes, Creating Health from the Ground Up Pablo Gregorini,Iain James Gordon,Carol Kerven,Fred Provenza,2022-09-27 This Research Topic is hosted in partnership with the Grazing in Future Multi-Scapes international workshop. The workshop will be held online, 30th May - 5th June 2021. Throughout different landscapes of the world, "grazing" herbivores fulfill essential roles in ecology, agriculture, economies and cultures including: families, farms, and communities. Not only do livestock provide food and wealth, they also deliver ecosystem services through the roles they play in environmental composition, structure and dynamics. Grazing, as a descriptive adjective, locates herbivores within a spatial and temporal pastoral context where they naturally graze or are grazed by farmers, ranchers, shepherds etc. In many cases, however, pastoralism with the single objective of maximizing animal production and/or profit has transformed landscapes, diminishing biodiversity, reducing water and air quality, accelerating loss of soil and plant biomass, and displacing indigenous animals and people. These degenerative landscape transformations have jeopardized present and future ecosystem and societal services, breaking the natural integration of land, water, air, health, society and culture. Land-users, policy makers and societies are calling for alternative approaches to pastoral systems; a call for diversified-adaptive and integrative agro-ecological and food-pastoral-systems designs that operate across multiple scales and 'scapes' (e.g. thought-, social-, land-, food-, health-, wild-scapes), simultaneously. There needs to be a paradigm shift in pastoral production systems and how grazing herbivores are managed -grazed- within them, derived initially from a change in perception of how they provide wealth. The thoughtscapes will include paradigm shifts where grazers move away from the actual archetype of pastoralism, future landscapes are re-imagined, and regenerative and sustainable management paradigms are put in place to achieve these visions. From this will come a change in collective thinking of how communities and cultures (socialscapes) perceive their relationships with pastoral lands. The landscapes are the biotic and abiotic four-dimensional domains or environments in need of nurture. Landscapes are the tables where humans and herbivores gain their nourishment, i.e. foodscapes. Foodscapes and dietary perceptions, dictate actions and reactions that are changing as developed countries grapple with diseases related to obesity, and people starve in developing countries. Societies are demanding healthscapes and nutraceutical foodscapes, and

paradoxically, some are moving away from animal products. While indigenous species of animals, including humans (wildscapes), have been displaced from many of their lands by monotonic pastoralism, multifunctional pastoral systems can be designed in view of dynamic multi-scapes of the future. The purpose of this Research Topic is to influence future mental and practical models of pastoralism in continually evolving multi-scapes. We seek a collection of papers that will cultivate such a shift in thinking towards future models of sustainable multipurpose pastoralism. The contributions will be synthesized to establish how multifunctional pastoral systems can be re-imagined and then designed in view of the integrative dynamics of sustainable future multi-scapes.

The Yak Gerald Wiener,Han Jianlin,Ruijun Long,2003 The yak must be regarded as one of the world's most remarkable domestic animals. It thrives in conditions of extreme harshness and deprivation while providing a livelihood for people. Chinese historians have argued that without the yak's capacity to live in such a hostile environment, human civilization might not have established and flourished in these remote areas. This book traces the development of this remarkable animal and then describes in detail its characteristics, performance and products. There is also a discussion of more recent research and development projects that may provide a basis for improvements in yak performance and in the utilization of rangelands. This research may lead to a wider distribution for the yak and to the better utilization of yak products. Any marked changes in yak husbandry are likely to have far-reaching consequences for the social fabric of a society of pastoralists.

Trends in Artificial Intelligence Salvatore Gaglio,1991-10-09 This book collects the scientific papers presented at the 2nd Congress of the Italian Association for Artificial Intelligence, held in Palermo in October 1991. It displays the state of the art of both Italian and European scientific research in AI. The book begins with an invited paper by W. Wahlster et al. The bulk of the book is then divided into five parts on: - Knowledge representation (18 papers), - Knowledge acquisition (5 papers), - Natural language (5 papers), - Perception and robotics (5 papers), - Architecture and technologies (5 papers). A section containing short papers completes the book. The high quality of the papers reflects massive research activity mainly devoted to the theoretical aspects of AI, but clearly aimed at consolidating the results already achieved. Several contributions are oriented to the technological aspects of AI.
