*Analyses of Concept Learning* Herbert J. Klausmeier,Chester W. Harris,2014-05-12 Analyses of Concept Learning covers the papers presented at a Conference on Analyses of Concept Learning, sponsored by the Research and Development Center for Learning and Re-education of the University of Wisconsin, held in October 1965. The book focuses on efficient learning for children, youth, and adults, including concept learning, problem solving, and progresses in cognitive abilities. The selection first offers information on the formal analysis of concepts, psychological nature of concepts, and analysis of concepts from the point of view of the structure of intellect. The text then examines the relationships between concept learning and verbal learning and meaningfulness and concept. Discussions focus on linguistic analysis of nonsense syllables, linguistic concepts as determiners of meaningfulness, stimulus selection and stimulus bias, response learning and associative learning, and implicit associative responses. The book takes a look at the learning of principles, developmental approach to conceptual growth, and learning in adulthood. Topics include consistency in mental abilities, comparison with long-range trends in stability of mental functions, anxiety derived from conflicts over learning, motivation to maximize similarity to a model, and the scientific meaning of concept. Meaningful reception learning and the acquisition of concepts and a model for the analysis of inquiry are also discussed. The selection is a vital reference for researchers interested in concept learning.

*Tribals, Battles & Darings* Alexander Clarke,2020-10-30 The conception and evolution—through inter-war tensions, global war, and years of Cold War hostility—of the Royal Navy’s large fleet destroyers. The Tribal class destroyers are heroes of the Altmark incident, of the battle of Narvik, and countless actions across all theatres of operation. Yet there has been surprisingly little written about these critical ships, still less about their wartime successors, the Battle class, or their postwar incarnations, the Daring class. This book seeks to rectify this by describing the three classes, each designed under different circumstances along destroyer lines but to general-purpose light cruiser form, from the interwar period through to the 1950s, and the author explains the procurement process for each class in the context of the needs and technology of the times. Taken together these classes represent the genesis of the modern general-purpose destroyer, breaking from the torpedo boat destroyer form into a self-reliant, multi-purpose combatant capable of stepping up to the cruiser’s traditional peacetime patrol missions whilst also fulfilling the picket and fighting duties of the wartime light cruiser or heavy destroyer. This is the first work to analyze these three classes side by side, to examine their conception, their creation and their operational stories, many heroic, and provide an insight into ship design, operation and culture. In doing so, the book aims to contribute a better understanding of one of the most significant periods in the Royal Navy’s history. In its clear description of the genesis of the modern destroyer, this book will give the reader a clearer picture of its future as well. Historians, professionals and enthusiasts will all enjoy this wide-ranging and detailed study.

*GUI Design* Shan ben tu shu,2015 As technology has rapidly advanced, so too has the way we use and interact with it. Gone are the days of flat black backgrounds dotted with blocky green text; now, users expect a massive range of colors, layouts, and fonts to be used to entertain and assist them in their daily lives. GUI Design assembles the best of recent graphic user interface for a collection that provides practical encouragement for those new to the world as well as inspiration for experienced designers. The book gathers Twitters Vine video creation app for Windows phones, the vulgar-yetamusing Authentic Weather app, an application designed to help tourists follow the physical and ideological path of the Iron Curtain, and more to showcase programs that balance information flow with user experiences and highlight the creativity, inspiration, and expressive techniques used in their design. The projects within demonstrate the increasingly significant role of user interfaces in both design and our everyday lives in the modern world.
