**Split by Sun** Tom Faunce, 2018-11-29 A FUTURE EARTH IN WHICH EVERY ROAD AND BUILDING UTILISES NANOTECHNOLOGY TO MAKE CLEAN FUEL, FOOD AND FERTILISER JUST FROM WATER, SUN AND AIR. When agent Jean Moulin investigates the mysterious connections between a murdered woman in Hampstead and assassination attempts on the President of the Whole Earth Council, he's led back to the origins of the Global Synthetic Photosynthesis Project in Namibia as well as the forces that wish to destroy it and its visionary eco-gendered founder. Split by Sun is a witty and poetic novel that explores whether humanity is meant to globally deploy a solar energy technology to progress enforceable rights of ecosystems, electronic citizen voting on laws, the marriage of corporations to public goods, community-scale industry, the abolition of war and nuclear weapons, the facilitation of universal basic income, healthcare and education and the replacement of religion with widespread experience of unitive consciousness.

**Watching the Dragonfly Dance** Rhonda Johnson Wootton, 2017-07-10 Since the fall of the USSR, Mongolia has been a veritable open door for Christianity to spread far and wide. Starting in the early 1990s, God set the stage for Mongolia Campus Crusade for Christ (MCCC) to facilitate a message of hope and deliverance for a time such as this when Zula, a young Mongolian mother and MCCC staff member would forge a lasting friendship with Rhonda, a stateside Christian conciliator and grandmother, through a short-term mission partnership with MCCC. This story takes you on the journey of God's design that brought these two women together from completely different countries and cultures and transformed them through heartrending tragedy. Gratitude has come as I've made this journey. I'm thankful that God is using my broken heart to transform me for His purposes and for His glory, and to bring encouragement to the hurting hearts of others who have also experienced loss. - Rhonda Johnson Wootton I now consider my grief to be a precious gift. - Zula Jantsan This book is so unusual that it is hard to describe. Its unusual nature makes it stand out, almost demanding that we read it. I am sure you will come to the same conclusion once you read it, which I hope you do. Rhonda and Zula are friends who live about as far apart on this earth as two people can. They were already friends. But their deep friendship was forged through suffering, as deep friendships often are. They both lost sons, and only days apart. Strangely (and providentially), Rhonda was with Zula, comforting her over the tragic loss of her son, when her own son died just as tragically. They suffered together and grieved together. Now they have written a book together, a book full of sorrow, hope, wisdom and light. I commend this book to you, not only because it is so unusual, but also because it is so lovely and deep. - Jerry Sittser, author of *A Grace Disguised* and *A Grace Revealed* God binds us together across continents and cultures to be one body. In the pages that follow you will hear a story of pain, sadness and loss, but also of faithfulness, hope and redemption shared by two women of faith separated by thousands of miles and joined by one great Savior. This testimony is an encouragement to every one of us to keep walking and keep looking up to God through the darkest chapters of life and death. -Tim McConnell, Lead Pastor, First Presbyterian Church, Colorado Springs, author of *Happy Church*

**Landscapes and Landforms of the Horn of Africa** Paolo Billi, 2022-09-30 This book focuses on regions for which until now the geomorphology was very poorly studied and relatively unknown. Nevertheless, the landforms and landscapes of the Horn of Africa are highly attractive, diverse and in a few cases unique, since they span very different environments, from highland plateaus and mountains to lowlands (even below sea level) and coastlines with a high degree of diversity and from monsoon to arid climate conditions. The main topics addressed in the book include the links between the geological evolution and the current large scale geomorphology of the Horn of Africa; the large differences between the highlands and lowlands climate, river hydrology and their variation through time within a climate change perspective. This part of the world was home of the very first hominids. The landscape in which they lived and evolved throughout the Pleistocene is described in comparison with the arid and inhospitable, though immensely scenic, environment of today. Perennial and ephemeral rivers with very different morphology, processes, and hydrology drain the area, and, in combination with the past and recent uplift, substantially contributed to provide the region with peculiar landscapes and landforms. Long lasting weathering and erosion processes result in a typical inselberg landscape such as the Bur region, or the currently exposed flatland of old peneplain surfaces. Their changes through time, induced by both natural and anthropogenic factors, are addressed by a couple of case studies. Though the region has few inhabitants, they had to struggle to find their livelihood in a land that offers poor resources. This resulted in landscape change and land degradation. Examples of human impact on the landscape are presented at different scales. This book provides readers interested in geography and geomorphology with essential scientific and educational information on the Landscapes and Landforms of Eritrea, Djibouti and Somalia through simple, though scientifically, rigorous texts illustrated with several color maps and photos. One main prerogative of this book is therefore to give an insight into a region of the world where, for geographical and historical constraints, geomorphological investigation was very limited, thus enriching its intrinsic informative value.

**Queen Victoria's Wars** Stephen M. Miller, 2021-06-17 This is a new history of Britain's imperial wars during the nineteenth century. Including chapters on wars fought in the hills, on the veldt, in the dense forests, and along the coast, it discusses wars waged in China, Burma, Afghanistan, and India/Pakistan; New Zealand; and, West, East, and South Africa. Leading military historians from around the world situate the individual conflict in the larger context of British domestic history and British foreign policy/grand strategy and examine the background of the conflict, the war aims, the outbreak of the war, the forces and technology employed, a narrative of the war, details about one specific battle, and the aftermath of the war. Beginning with the Indian Rebellion and ending with the South African War, it enables readers to see the global impact of British imperialism, the function of

the army in the service of British political goals, and the evolution of military technology.
