Confronting Corruption Jeremy Pope, 2000 The first version of this Source Book argued the case for a National Integrity System, an holistic approach to transparency and accountability and embracing a range of accountability pillars, democratic, judicial, media and civil society. The expression has since passed into common usage in development circles, and the argument for an holistic approach to anti-corruption efforts has similarly achieved a widespread consensus. The fight against corruption is not wholly a moral one, in the sense that it is a struggle against the intrinsic evil of corruption. Certainly there is a moral element - and one which cuts across all major religions and societies throughout the world. But the compelling reason for the struggle is the suffering and deprivation corruption brings to whole societies, and to the world's most poor. It is concern for the latter, rather than a distaste for the corrupt and their deeds, that rightly drives the global movement against corruption.

Alternative Sweet and Supersweet Principles Ram Snehi Dwivedi, 2022-09-24 This book compiles the latest information on different kinds of natural, plant-based super sweeteners. A book on alternative, natural super sweeteners is extremely timely and useful, especially, in light of the decreasing cultivable area, ever increasing demand for sucrose, and the well identified ills of sugar consumption. Every year more than 5.0 million people die due to diabetes and diabetes-associated diseases like cardiovascular, kidney disorder, liver cancer etc. This book describes the use of non-saccharide super sweet principles to counter such maladies. The readers will get an in-depth understanding of different kinds of sweeteners, molecular basis of sweetness, their general classification, plant source with photo-plates etc. The chapters explain different kinds of super-sweet principles. This book emphasizes on the propagation, cultivation and conservation of NSSS plants

(NSSSP) and extraction of super sweet principles and granting of generally recognised as safe (GRAS) certificate to sweeteners. The concluding chapter describes the eco-physiological difference between saccharide super sweet and non saccharide sweet plants. The book also describes commercial production of selected potential Natural Super Sweeteners. This book will be of great interest to researchers, extension workers as well as postgraduate students in Food science nutrition, ayurveda, plant physiology, Unani, naturopathy, biochemistry and plant breeding. It would also be of interest to industry stakeholders in sweetener industry and alternative sweetener manufactures.

War with Iran Geoffrey Kemp, 2013 War With Iran: Political, Military and Economic Consequences provides readers both a history of Iran's relationship with the West and an expert's estimation of what the political, human and financial costs of full-scale war with Iran might be. Authors Geoffrey Kemp and John Allen Gay of the Center for the National Interest utilize their years studying and informing America's foreign policy in the Middle East to bring to life the possible outcomes of an American military intervention in Iran. Such a decision would not only have catastrophic consequences on the Persian Gulf, but would also endanger the whole world's delicate economy by heightening instability in a fragile but resource-rich region. Written for anyone with an interest in the future of American foreign policy, War With Iran explores what every player has at stake in the current crisis by analyzing

every tension adjacent to it; from America's staunch support of Israel to Iran's own dogged pursuit of advanced nuclear capabilities. Controversial, timely and thoroughly researched, this story stands as a preliminary caution against what would be a devastating meltdown of diplomacy, for which--if peace be the goal--there is always time.
