Lighter as We Go Mindy Greenstein, Jimmie Holland, 2015 Contrary to common wisdom and the fears of mid-lifers, our sense of well-being actually goes up in older age, even in the presence of illness or disability. *Lighter as We Go* is the first book to explore how and why that is, drawing on positive psychology concepts of character strengths and virtues.--Publisher information.

Short and Sweet and Pithy Eddie A. U. Akpan, 2022-03-11 Each of us is supported by three pillars; the physical, financial, and spiritual pillars. Our body is the chamber or enclosure that entitles us to operate in the physical world. Every day, take some minutes to sing, read, give thanks for all things, do calisthenics, and your pillars will remain strong for a long time. Hercules is endowed with superlative physique; good for him, but even if his wisdom exceeds King Solomon's, he would not be a happy camper if he has no skills that people can pay for. Turning things around, a wealthy but unwise Hercules would get into more trouble than he can pay for. We need three solid pillars (health, money, and wisdom) so that we can hold our head high like an eagle and shoulders straight like an arrow. In the spiritual world, all things are possible.

Peculiar Faith Jay Emerson Johnson,2014-03-01 Residing at the intersection of constructive theology and critical social theory, this book provides a resource for both students and clergy to reinterpret Christian theology and re-imagine Christian faith in the twenty-first century. The author seeks “to encourage and equip Christian faith communities to move beyond the decades-long stalemate over human sexuality and gender identity” because “Queer gifts emerge in Christian communities when lesbian, gay, bisexual, and transgender (LGBT) people no longer feel compelled to justify their presence in those communities.” Useful in both seminary classrooms and in congregational settings, the book is a contribution to the still-emerging field of queer theology, translating the rigors of scholarly research into transforming proposals for faith communities.

It is really very simple: This book is intended to lay the blueprint for success for Newbies who are involved, or want to be involved, in Internet marketing, or more appropriately, those who want to make money online. While many people generally may have been slow to catch on to the internet marketing frenzy due to its structural and logistics handicaps, the trend in the last few years has shown a dramatic upsurge of interest of Newbies in the internet marketing industry. With liberation in internet access and mobile technology, we now have the perfect storm for an explosion in internet marketing activities globally. There is therefore an urgent need for a manifesto or explanatory document that will explain to practitioners in the internet marketing scene what is required to be a successful internet marketer globally

Computers, Curriculum, and Cultural Change Eugene F. Provenzo, Jr.,Arlene Brett,Gary N. McCloskey,2004-09-22 Computers, Curriculum, and Cultural Change: An Introduction for Teachers, Second Edition is a comprehensive introduction to using computers in educational settings. What distinguishes this text from others on the topic is its focus on: *the issue of how computers are redefining our culture and society and the work of schools; *the idea of using the computer as a tool for increasing efficiency and productivity in curriculum; and *the concept of the computer as a tool not only for efficiency, but actually as a means of enhancing intelligence. This text provides students with an introduction to basic computer skills and experience, enhanced by helpful pedagogical aids, including case studies and highlighted features, such as Portfolio Development, Reflective Practice, Computing Timelines, Filmographies, bibliographical sources, and a text-linked glossary of key computer terms. New in the Second Edition: In addition to being thoroughly updated, a new section has been added to Chapter 1, Creating an Electronic Portfolio, with activities linked to the standards for educational computing established by the International Society for Technology in Education (ISTE). Electronic portfolio activities at the end of each chapter give students the hands-on practical skills they need and, at the same time, cover the necessary theoretical and conceptual material for an introductory educational computing course.
