Aquarium Yaara Shehori, 2021-04-13 A debut novel following two sisters, both deaf and raised in seclusion by deaf parents, and the shattering consequences that unfold when that isolation comes to an end. Sisters Lili and Dori Ackerman are deaf. Their parents—beautiful, despondent Anna; fearsome and admired Alex—are deaf, too. Alex, a scrap metal collector and sometime prophet, opposes any attempt to integrate with the hearing; to escape their destructive influence, the girls are educated at home. Deafness is no disability, their father says, but an alternative way of life, preferable by far to that of the strident, hypocritical hearing. Living in a universe of their own creation, feared by and disdainful of the other children on their block, Lili and Dori grow up semi-feral. Lili writes down everything that happens—just the facts. And Dori, the reader, follows her older sister wherever she goes. United against a hostile and alien world, the girls and their parents watch the hearing like they would fish in an aquarium. But when the hearing intrude and a devastating secret is revealed, the cracks that begin to form in the sisters' world will have consequences that span the rest of their lives. Separated from the family that ingrained in them a sense of uniqueness and alienation, Lili and Dori must relearn how to live, and how to tell their own stories. Sly, surprising, and as fierce as its protagonists, Yaara Shehori's *Aquarium* is a stunning debut that interrogates the practice of storytelling—and storyhearing.

Freshwater Aquariums David Alderton, 2012-05-15 For beginning aquatic fancier looking to start out right with fish, *Freshwater Aquariums* by David Alderton is the ideal primer. A vertebrate that breathe primarily by means of gills and swim by means of fins is

the author's lead-in to the first chapter called What are Fish? Alderton builds the reader's confidence by providing solid information about what fish are anatomically speaking, how they evolved, how they breathe, how they move, where they live, and how they behave. The new fancier's aquarium begins in chapter two with instructions on setting up the tank, including selecting the right size, figuring out how many fish, setting the tank, equipment, substrate, heating, lighting, filtrations, plants, water chemistry, assembly, and more. Choosing the freshwater fishes that appeal to the reader is the subject of Introducing the Categories of Fish, which schools readers in seven categories: Cyprinids (e.g., goldfish, minnows, and barbs), Characins (e.g., tetras), Cichlids (e.g., oscars, angelfish, and discus), Anabantoids (gouramis, bettas/Siamese fighting fish, and paradise fish), Toothcarps (guppies, swordtails, platies, black mollies, and killifish), Catfish, and others (loaches and Chinese algae eaters). The purchasing, maintenance, and feeding of fish are described in considerable details, and the author gives a basic overview of breeding and keeping fish healthy as well. Resources, glossary, and index conclude the book.

Aquarium David Vann, 2015-03-03 From the award-winning author of *Legend of a Suicide*: "A kind of modern fairy tale . . . Vann's novels are striking, uncompromising portraits of American life" (Kirkus Reviews, starred review). David Vann's dazzling debut *Legend of a Suicide* was reviewed in over a 150 major global publications, won eleven prizes worldwide, was on forty "best books of the year" lists, and established its author as

a literary master. Now, in crystalline, chiseled yet graceful prose, *Aquarium* takes us into the heart of a brave young girl whose longing for love and capacity for forgiveness transforms the damaged people around her . . . Twelve-year-old Caitlin lives alone with her mother—a docker at the local container port—in subsidized housing next to an airport in Seattle. Each day, while she waits to be picked up after school, Caitlin visits the local aquarium to study the fish. Gazing at the creatures within the watery depths, Caitlin accesses a shimmering universe beyond her own. When she befriends an old man at the tanks one day, who seems as enamored by the fish as she, Caitlin cracks open a dark family secret and propels her once-blissful relationship with her mother toward a precipice of terrifying consequence. “A blue-collar parable . . . [The character] looks back on her life as a child looks into a tank, hoping to make sense of the world inside—a theme Vann develops beautifully, creating a mysterious realm of the wintry American city.” —The Guardian

The Ocean at Home Bernd Brunner, 2012-01-01 The mysterious world beneath the ocean's surface and its inhabitants have captivated humanity for centuries—the Egyptians, Greeks, Romans, and ancient Chinese all kept fish in their homes to observe and admire. But it was not until the nineteenth-century invention of the aquarium that the deep was truly domesticated, offering the curious a chance to create an indoor exotic sea world, in miniature. In *The Ocean at Home*, Bernd Brunner traces the development of the aquarium from the Victorian era to the present day. Along the way, in this fascinating history, Brunner provides insight into the cultural and social circumstances that accompanied the aquarium's swift rise in popularity. Brunner tells a compelling story of obsession, discovery, and delight—from the aquarium's origin as a tool for scientific observation to the Victorian era's elaborately decorated containers of curiosity, to the great public aquariums that are popular in cities around the world today. Featuring more than 100 illustrations, this updated edition of *The Ocean at Home* offers a colorful and captivating look at how a Victorian obsession still enchants many today. Both the owner of a humble goldfish bowl and the dazzled spectator at major public aquariums will find *The Ocean at Home* an appealing and knowledgeable guide to the aquatic worlds we create.
